grease ease PREMIUM DOSING SYSTEM

It is no longer acceptable to pour harsh caustic chemicals or acids down the drain to clear fat build up or blockages.

The grease ease premium dosing system is designed to dispense a unique biological culture into your drainage waste systems to help prevent the build up of fats, oil & grease (FOGs). The systems can be programmed to suit your kitchen schedule, allowing you to customise the time to dispense a measured dose of grease ease premium solution into the kitchen waste/drainage pipes, providing accurate, automatic dosing without the fuss of manual dosing.

The grease ease system comes complete with the choice of a mains or battery-operated peristaltic dosing unit, 25 litres of our unique grease ease premium solution that provides accurate, automatic dosing of environmentally friendly enzyme-based chemicals that will naturally prevent the build-up of fat.

Option of Mains or Battery Operated Pump
